PROFILE

As a passionate and aspiring software developer, I am a fresher in the world of coding, eager to embark on an exciting journey of innovation and technology. I am deeply enthusiastic about programming and driven by a relentless desire to develop innovative solutions. With a firm commitment to honing my skills and expanding my knowledge, I aspire to evolve into a proficient software developer in the near future.

WORK EXPERIENCE

ATGWORK company

June 2022 - Aug 2022

- Created an engaging and responsive demo website for the consulting company. Utilized HTML5, CSS3, and JavaScript for a visually appealing user interface.
- Collaborated closely with the design team for a seamless user experience.
- Used CLI for debugging, troubleshooting, and automation of repetitive tasks.
- Demonstrated expertise in GitHub and implemented Git branching strategies for feature development and bug fixing.

Web App Project: Petit

Sep 2022 - Dec 2022

- Developed a web application using React, enabling salon business owners and clients to manage appointments efficiently. implementing modular UI components for future scalability.
- Established a Trello-Atlassian project board to streamline project management and created a dedicated workspace for UX design.
- Create Date picker components, and a Toggle switch for displaying selected available times.
- Developed a customizable sign-up form using custom components, enhancing user registration for both customers and salon owners.
- Enhanced user experience by adding container classes to specific views, preventing styling conflicts, and updating global styles for zone-specific requirements
